May 20, 1968.

Mr. Earl M. Staker  
Area Engineer  
Office of the State Engineer  
6 East Main  
Price, Utah 84501.

Dear Mr. Staker:

Re: Salina Creek Irrigation Company.

I am sending to you herewith an unsigned application for changes in points of diversion in connection with the matters you and I have discussed and about which we have corresponded.

The formal executed Application is or will be in this same form, unless you feel there are certain deficiencies or uncertainties which should be cleared up in the signed Application which will be sent to you for filing.

I had intended to send this today, with the instant letter, but decided to submit the instant and inclosed copy for examination by you and for any comments you may desire to make in connection with it. If you feel that any items should be more completely explained or set forth or if you have any other suggestions which you feel would be helpful to the State Engineer's Office in passing on the matter, please let me know.

The signed Application will be submitted at once on receipt of a reply or telephone call from you, or if you are going to be in Richfield within the next day or two, possibly you could call at the office.

I am not inclosing a check for the filing fee herewith, but will do so, of course, when the original signed and executed Application is forwarded to you.

Thanks for your help and cooperation.

Very truly yours,

M.
